What Do You See Through the Crystal Ball?

You will find the room standing on its head. The upside-down view is an optical effect caused by the shape of the crystal.

Pyrosaurite

Crocoite

Quartz (var. rose)

Rhodochrosite

Rhodochrosite (with quartz)
Muzo
Colombia
This specimen is a fine example of the mineral rhodochrosite, which is a variety of the carbonate mineral rhodochrosite. It is characterized by its vibrant pink to red color and is often found in association with quartz. The specimen shown here is a small, well-developed crystal that has been carefully selected for display.
