

The Great time I Had

Have you ever had the most fantastic time of your life? I had it during the last semester break.

There were many places that I went to during the last semester. The place that made me the most excited was Beijing, China. I went there with my family and stayed for 4 days. Everything in China (castles, temples, architecture, food, ect.) made me know how different the culture and daily life of Chinese people is from Thai culture and people. What fascinated me most about the Great Wall is how the Chinese people built it. When I saw it, I did not disagree that it is the one of the wonders of the world. It made me feel the grandeur of the Chinese, the people who call themselves "Dragon people". This was a very nice trip for me.

For the next semester break, I still do not know what I will do or where I will go. One thing that I want to do is to practice to be a guide in order to get more experience and to improve my use of the English language. I will learn to be more patient toward others and maybe I will also get a better English grade in the next term.

The fantastic experience I had during the last semester break will be fixed in my heart for a long time, or at least until the next trip! I hope during the next semester break I will also have a wonderful experience. Lastly, I wish everyone will be able to have a great time like I did.

"My Activities"

During the last semester break I had an opportunity to do many things that I wanted to do, and it made me really happy, for example, meeting my old friends, watching movies, traveling with my family, and playing games. All of these things made me happy, on the other hand, there are somethings that made me sad.

I had about 800 baht stolen when I went to the float market with my family. I was very sad about that, so I reminded myself that I don't want to forget about my money anymore.

The next semester, I made a plan to do something interesting like working-part-time jobs. I have wanted to work for a long time, and I think that I'll do it next semester if it's possible.

As a matter of fact, there are many reasons why I want to work part-time jobs. First, I want to spend my freetime to work, because in the past I did many useless things. Second, I want to make money. I think I will be proud of myself if I can make money by myself. The last and most important reason is that I want to have many experiences. I think that experiences are very valuable to one's life. I think that if people have experiences, then they become more efficient at whatever it is that they do

Soccer and Basketball

w6

If you could choose to see only one sport game programme, what would you pick between "soccer" and "basketball"? Both sports are great and fun, I know it's hard to choose one of them, however I had to make a decision after I found the similarities and differences between the two sports. Ultimately, I think I will have a more wonderful time in watching a soccer game than a basketball game.

At this point, I think ~~the~~ soccer and ~~the~~ basketball are similar in many ways. First of all, both sports use a round ball in their games. Players can be men or women and that makes both sports popular with many Thai citizens. Also, soccer games and basketball games can both be played indoors and outdoors. That they make it convenient to play anywhere you want.

Anyway, I found my final answer when I looked at the differences between the two sports. The most important reason concerns the rules of each sport, I think I can understand soccer's rules more than basketball's. If you break the rules or do something bad to the other player's team, you will get a yellow or red card. On the other hand, basketball has complicated rules, for example, when you hold the ball, you can't run. In addition, there are other rules that are difficult to understand, maybe I think

I like watching and playing soccer more because of those reasons. Also, the basketball is played with the hands but soccer is played with the feet and that also makes them different from each other.

In conclusion, no matter which sport you play, I think it's good for your health and it will make you stronger. If you don't have a favourite sport yet, could I suggest these to you? I think that soccer and basketball are good to play and do as activities with your family and your friends, too.

Five Star Hotel. (Rewrite)

Last week on Monday 9th, was ~~the~~^a day that I will never forget. It was my first time to stay in a five star hotel, the Sheraton Orchid Hotel. My relative who works in Australia now, came to Bangkok because of her business and she wanted to see me because we have seldom met each other in the last few years.

In fact, I didn't have much time at that time due to my studies at Silpakorn. and had to do many reports during that week, but staying in the Sheraton Hotel sounded nice so I managed my spare time to be able to meet my aunt one afternoon.

Because of its reputation of luxury, I wanted to explore this hotel and find out for myself whether it was as nice as I expected or not. because I have seen this hotel many times, but only from the outside so this was a great opportunity for me to see things inside the hotel.

I went there from my campus by boat at noon and arrived there at 12:30 which meant it took only 30 minutes to get there. I took a lift to ~~the~~ 26th floor which was ~~a~~^{the} highest floor of this hotel. When I reached the room of my aunt, I discovered that the room was small, not as big as it should be, but other things were great. The thing I liked the most was I could see a beautiful view of Bangkok from this room such as a view of the Chao Phraya river, nice architectural buildings and many skyscrapers.

I spent all of my afternoon with my aunt. We ordered food for our lunch, watched movies on television but the biggest part was talking. I like talking with my aunt. She has a good sense of humour, she is talkative and such an extroverted person.

She will stay there for 2 weeks so I hope I can go there again. This hotel provides many activities for customers so if I want to have fun and relax, I should go there again!

No-one wants to be in debt! 9.5

Nowadays, the credit card industry has become a huge business in Thailand, which is growing very quickly. Many companies and banks have tried to create the demand for people to use their cards. You can see it on TV. Propaganda everyday in the constant advertisements. Credit cards provide many good advantages to the user, for example, you don't need to carry around a large amount of cash with you, with only one card you can buy whatever you want and pay with cash later. See.. how easy it is! Besides credit cards are used to make a record of indicate a person's purchases with a statement so that is why many people want to have one.

But ~~the~~ a problem emerges when you spend a lot of money easily. ~~so~~ ~~that~~ The next thing you know you have large amount of bills to pay but you do not have enough money to pay for all of those bills. You are now in Credit card debt! so what are you going to do? Many people find out that their lives have been ruined by being in debt. They worked so hard for months and had hoped to enjoy their own little gifts from their salaries but now they have to spend it in order to pay for their debt. Some people have to sell everything they own to pay their debt such as their houses or cars which is necessary to do and to pay for some electricity which they brought by credit card. Sadly, some people commit suicide just to escape from the pressure of their debt.

So the way to solve this problem is be careful spending your money. Think over and over everytime you are going to buy something. Try to buy only what is necessary and what you do really need or what for your life. Try to save your money for any emergencies that might arise. And above all, you should have only one credit card and use it reasonably!

The Interview of AIS (Rewrite)

Last Friday, I was interviewed by the officer of the biggest mobile phone company in Thailand, well known as AIS. I was chosen from among my friends as a representative due to my work last year when I did a lot of activities at my university such as being a head leader for organizing a camp during a semester break. Now I am one of AIS's customers as well so my opinion would be more helpful to them if they wanted to do a market survey for their company. We made an appointment to meet up at the student union's room at 10 A.M, but they arrived around 10:30 A.M. It wasted my time because I was absent from my class in the morning, but I said nothing even though I was absolutely not satisfied with the situation. The officer who interviewed me was a woman, she was small but she had very long hair and dressed in her company's uniform like most of her friends, there was ~~just~~ only one person who dressed in casual clothes. She asked me many questions such as what did I feel about campus activities? ^{how I felt} I replied to her gently that I was really pleased to take part in many activities of my campus, especially when I was a head leader for organizing the camp last year which gave me precious opportunity to organize the project myself even though there were many barriers, but finally, I was able to get through it. Then, she asked me many questions but it didn't take that long so eventually, the interview was completed at around 11 A.M.

Four kinds of popular movies in Thailand.

There are many kinds of movies. In Thailand, there are four kinds of the movies that are very popular such as horror, comedy, romantic and action movie. Each kind has its own style, theme, scene, actor etc.

Thailand is like other common countries in the world. There is a movie industry itself so that citizens can relax and enjoy seeing movies even though it is not as big as other countries. It provides a various kinds of movies to Thai people such as thriller, romantic, action, comedy and horror movie, but there are four kinds of popular movies that most of Thai people usually go to see.

One of the most popular movie styles is horror. Horror is a form of movie in which the story can scared you while you have to pay attention to get its point all the time. It is so strange that it is so scary but people love it. For example, "Shutter" is a Thai film which earned a lot of money because it is so exciting and panic.

Second is comedy style. It is the style of joke or funny movie. Sometimes it includes with romantic style which is called "romantic-comedy movie". The story can be everything and add with joke. It can make audiences laugh with its joke.

The third kind of popular movies in Thailand is romantic but you can't won't find pure romantic movies easily. It's always romantic dream or romantic comedy. Romantic is kind of a movie which make you impressed. It's like you live in a dream. Romantic movies which are very popular in Thailand such as Love actually, Fan Chan (Thai movie), The letter.

มหาวิทยาลัยศิลปากร

The last kinds of popular movies in Thailand is action. I think one reason for attract Thai people to see because it's worth for money that you pay. The Chinese and Hollywood action movies which is imported to Thailand can gain enormous incomes in Thailand. Thai people and children know many foreign actors pretty well such as Chen Lhong, Vin Diesel and Brad Pitt. The action movie is interesting for you all the times for exciting emotion.

Nowadays, movies in Thailand were developed into other kinds such as Indy, short films, reality films. It's good for audiences because they will choose any kinds of them. Changing of movies depend on the life style of people in the country as well.

How to make a happy life

Sometimes, we disregard the happiness and without realizing it. Because of strain or sundry problem that make you exhausted. So we should know some ways to release the tension by ourselves. This is the methods that make the happiness. First, you should living as today is the last day that you exist. If you want to do some things, you must do it this time and don't release the time pass by you. Always thinking, it hasn't tomorrow. Second, it isn't too late, if you want to contact your old friends by telephone, e-mail or write a letter. When you can contact them, you may call for them to travel with you in someplace that you want to go. Next, creating the miscellaneous household items, such as painting pictures, needlework, sweetmeat, etc. then, preparing a special menu for dinner or changes your home from the old one, and invites your close friends or your family for dinner. Besides, you should wait for the good things that are passing by your life, for example seeking a delicious restaurant where you never went it or wait for a funny holiday. In addition, to see a comical movie and laugh loudly, it makes you to be at ease. To smile every time because smile is communicable disease, if you smile, another person will smile to follow you. Finally, when you have already been happy, you should apportion the happiness to everybody. It means if you make something for yourself, don't forget make something for another person too.
